Understanding frames includes to know when not to use them.

2.

The first post to which I replied brought up a specific problem. The writer only assumed that frames would be required.

Both good points, Werner, so thank you for that. It is easy to make assumptions about things you know little of and I am guilty! So long as people are kind in the way they write to us new folk then all advice is welcome. I was once part of a newsgroup and made an error - I was severely shouted at by a guru and never went back.
