Hi,

```
#include <Core/Core.h>
```

```
using namespace Upp;
```

```
CONSOLE_APP_MAIN
```

```
{  
  FindFile ff;  
  
  if ( ff.Search ("c:\\*.*)" )  
  do  
  {  
    if ( ff.IsFile() )  
    {  
      LOG("File :" << ff.GetName());  
    }  
    else  
    if ( ff.IsFolder())  
    {  
  
      LOG("Dir :" << ff.GetPath());  
    }  
    else  
    {  
      LOG("?? :" << ff.GetPath());  
    }  
  }  
  while ( ff.Next() );  
}
```

Regards,  
omari
