Subject: Paste into QtfDesigner a table copied from Excel
Posted by omari on Thu, 03 Jan 2013 12:20:11 GMT

Hi,

When a table copied from excel, pasted into QtfDesigner, the result is an image!

this is a bug or a desired behavior?

Note:

a solution to this problem consist of:
1 - copie the table from Excel
2 - past the table into Word
3 - copie the table from Word
4 - past the table into QtfDesigner

the table then is pasted as rich text.

Regards,
omari
