Peter wrote on Thu, 10 January 2013 15:58 Why didn't ClearSession() in "bbb" destroy the session and .MY\_SESSION\_VARIABLE is still listed in "ccc"? What did I do wrong this time?

You did it right, this is a bug In Http::ClearSession(), there should be session\_dirty=true, otherwise the change in the variables is not stored and previous state is loaded in next request. I created an issue in redmine, so it'll be fixed soon.

Best regards,  
Honza
