lijst.SetTable(ARTIKEL);
lijst.AddKey(A_ID);
lijst.AddColumn(A_CODE, "Code");
lijst.AddColumn(A_NAAM, "Naam");
lijst.AddColumn(A_SUBGROEP, "Groep");
lijst.AddColumn(A_PRIJS, "Prijs").SetConvert(GeldIntConvert(1));
//lijst.SetOrderBy(A_CODE);
```

//////////

How can i sort the table with ABS like in mysql?

mysql query example: "ORDER BY ABS(track) DESC ".

Hi ercu,

Welcome to the forum

I'm not very familiar with SqlCtrl, but I believe you could make it work if you use
SetOrderBy(SqlFunc('abs', A_CODE)) or something like that.

Best regards,
Honza
