Hi all,

I use the following code using SysInfo package:

```
bool QSkillsWin::IsSingleInstance()
{
    if(GetWindowIdFromCaption(GetTitle().ToString())>0)return true;
    else return false;
}
```

```
GUI_APP_MAIN
{
    SetLanguage(GetSystemLNG());
    SetLNGCharset(GetSystemLNG(),CHARSET_UTF8);
```

```
    if(QSkillsWin().IsSingleInstance())
    {

        return;
    }
    else QSkillsWin().Run();
}
```

hope this could be helpful

Cheers
