omari wrote on Thu, 10 January 2013 13:02Hi,

I have to create a landscape page, then i want to set the page width in the editor.

the function exists in the RichEdit control:

 RichEdit editor;

 editor.SetPage(Size(6000, 4000));

Question:

how can I call this function from the QTF Designer?

Regards,
omari.

You cannot. Originally, QTF is designed not to contain such info.

Can change in future... (as this is repeated request).

Mirek
