I did not test it, but the correct syntax would be something like this:

```
Sql sql;
S_SOMETABLE rec;
sql*Select(rec).From(SOMETABLE).Where(key==1);
if (sql.Fetch(rec)
{
    //do something with the first record in rec
}
```

Or:

```
while (sql.Fetch(rec)
{
    //do something with all records
}
```

Read Sql Tutorial's 6th chapter.
