jibe wrote on Fri, 25 January 2013 09:30Hi,

As said in the title, I can't get FrameLess() working under Linux.

...

Am I doing something wrong, or is there a problem under Linux ?

Hi Jibe,

You are doing it right. The frameless flag is not regarded on Linux and AFAIK it never was. As far as I can see only Win32 and the new GTK backend support it.

Best regards,  
Honza
