Hi all,

I just updated my GraphDraw/GraphCtrl Packages in the svn sandbox.
I added some predefined Graphs along with their description in '.usc' files to allow easy use in layout designer.

I tried to make the look in designer the closest possible to the real Graphs: so almost ALL parameters are modifiable directly in designer :

- colors
- fonts
- width
- margins
- axis scale type : STD/LOG
- Axis format type: STD/LOG/DATE/TIME
- Labels (axis labels, title)
- ... and more

Here is how the four predefined graphs look when dropped in the designer
