Hi all,

I just updated my GraphDraw/GraphCtrl Packages in the svn sandbox. I added some predefined Graphs along with their description in '.usc' files to allow easy use in layout designer.

I tried to make the look in designer the closest possible to the real Graphs: so almost ALL parameters are modifiable directly in designer:

colors fonts width margins

axis scale type: STD/LOG

Axis format type: STD/LOG/DATE/TIME

Labels (axis labels, title)

... and more

Here is how the four predefined graphs look when dropped in the designer
