koldo wrote on Mon, 04 April 2011 16:13Hello typhoong

I think your doubts come from in page [http://www.ultimatepp.org/app\\$ide\\$install\\$en-us.html](http://www.ultimatepp.org/app$ide$install$en-us.html) it talks about Windows 7.

Do not worry. As that page says, the downloads include:

- Windows 7 Headers and Libs (do not worry about "Vista" here - this options contains Win98/2000/XP headers too).
- x86 C++ Compiler (you might want to install x64 compiler too)
- Windows SDK Utilities for Win32

Does it work with the new Windows 8 SDK?

<http://msdn.microsoft.com/en-us/windows/desktop/hh852363.asp> x

EDIT: It looks like the page says it doesn't include VC++ compiler. So it won't work.
