Hi all,

I just uploaded some more modifications

 Stacking priority management (manages the order in which elements are stacked on the sides )
 Legend drawing corrections (scaling issues)
 Added legend to StdGraphs + USC
 Added Title + Legend position management (can be put on any side of the graph)
 Some refactoring

I also just noticed that some files were missing causing no compile and no '.usc' file

Can somebody try it in the designer to see if I forgot something else ( normally no )
