Hi Mirek,

great job as usual

For the naming I think that it must be consistent for all new containers so that developers can easily identify just by reading:

instead of :

Quote:InArray (Array counterpart)

Order (Index counterpart)

OrderVector (VectorMap counterpart)

OrderArray (ArrayMap counterpart)

I would rather put:

OrderArray (Array counterpart)

OrderIndex (Index counterpart)

OrderVector (VectorMap counterpart)

OrderArray (ArrayMap counterpart)

The prefix should always be the same: 'order', 'in' or anything else but I think it should be as explicit as possible so 'order' seems correct to me
