Subject: Re: Skylark and Date/Time format
Posted by mirek on Sat, 09 Feb 2013 11:34:41 GMT

1. variable setting issue - this definitely is/was a problem, I have changed Add to GetAdd, should be fixed now.

2. The problem with Date/Time - I think that Zbych is basically right, OTOH we still also need to have LNG format for date (for regular text). I guess the solution is to provide one format as default (I think default should YYYY-MM-DDTHH:MM:SS) and second via function (e.g. Lng(date)). Quite easy to do, but I would like to have confirmation on this, so please comment

(BTW, note that the set of witz funcions is easily extensible, so for now, if in hurry, you can resolve the issue by adding some function).
