My best results:

424kb with VC++ 2010, release, optimize for size, all static, packed with UPX

If I leave MVC++ 2010 runtime library as DLL I get: 359kb

Quite good if I'm distributing more than one application and the user has this package installed:

<http://www.microsoft.com/en-us/download/details.aspx?id=5555>
