dolik.rce wrote on Thu, 14 February 2013 14:46IMHO it would be much more helpful to use "-Wall", but for that we would have to fix tons of warnings inside U++... I am using Clang and even with the default settings for warnings it outputs so many that theide nearly halts just from parsing all the output Clang produces

Well, one positive outcome is that I have investigated this choking and optimized it out
