unodgs wrote on Sat, 02 February 2013 05:27I switched to vc 2012 and Windows SDK 8.0 and unfortunately Core/Rpc package stopped compiling. There is rpc.h file in window sdk now and other windows h files instead of including this rpc.h includes our one I guess. If I change Core/Rpc/Rpc.h to for example UppRpc.h everything works fine. I didn't commit necessary changes because many apps use this package. I'm just reporting because something has to be done

I believe that changing

```
#include "Rpc.h"
```

to

```
#include <Core/Rpc/Rpc.h>
```

in .cpp files of Rpc package should fix this issue (unless M\$ would create Core folder in includes and put rpc.h to it

Committed, please check.

Mirek
