mechatronic wrote on Sun, 11 December 2005 05:46But when I built it first, it was correct. After I added the parts that cover by /\* ... \*/ and after //..., it was fail, and I've tried to solve by deleting them,..., I have not solved it yet. I think they're not involved with these bugs.

PS: Please replace Tranmission by Transport, it's new name. But these errors have presented.

Well, those errors you have listed are 100% caused by those two lines commented.

If uncommenting then produces another set of errors, it is another issue - I do not have enough information to resolve errors I am not aware of

However, consider packing your package (dir that contains those files) using zip (all files!) and uploading to the forum. Then I can easily check it/fix it... post back
