Hi,

Mirek, I just want to remind you that AsTable still has wrong postgres syntax:

Current syntax:
select COLUMN from ((select COLUMN from TABLE1) as TABLE2)

Correct syntax:
select COLUMN from (select COLUMN from TABLE1) as TABLE2

Fix:

```
SqlSet SqlSelect::AsTable(const SqlId& tab) const
{
 StringBuffer t;
 t << SqlCase(MSSQL|PGSQL, "")("(") //<---PGSQL added
 << "(" << text << ") as \t" << tab.ToString() << '\t'
 << SqlCase(MSSQL|PGSQL, "")(")"); //<---PGSQL added
 return SqlSet(String(t), SqlSet::HIGH);
}
```
