Subject: [FIXED] Wrong SizeVert icon on KDE desktop.
Posted by Klugier on Sun, 17 Mar 2013 12:22:19 GMT

Hello,

I have noticed some problem with vertical SizeVert icon on my KDE desktorop (Kubuntu 12.10).
Now, It is using gtk icon instead of KDE one. The solution is really easy. We need to change only
one line of code.

Firstly let's find find following file: CtrlCore/ImageX11.cpp; Next we need to jump to 417 line
number and change it to:

Image Image::SizeVert() FCURSOR_(XC_sb_v_double_arrow)

from

Image Image::SizeVert() FCURSOR_(XC_double_arrow)

Sincerely,
Klugier
