zsolt wrote on Thu, 07 February 2013 19:16 Update: Changed the title from "C++ -> JavaScript Compiler" to be more relevant.

There is a short Emscripten tutorial explaining what is this about.  
Very promising project  
Zsolt

The original opening post:

An extremely cool project

Hi Zsolt,

Thank you for this good news!  
I've a question: can we compile our U++ application by using LLVM?  
Does anybody tried to browserize its U++ GUI application?  
It works in 32 bit mode and there is no need to upgrade computer as with flashcc tool.

Luigi
