---

@Deepak: TheIDE has changed my pathes at "setup/build methods" to "bin/include" or "bin/bin" and this cannot work of course.

I have tried all versions of pathes now.

Now it is doing more, but I get "error invoking gdb!".

The MinGW-path at "auto setup" is always being removed by TheIDE.

@neil: I prefer the MinGW as it is free software. But I can believe it is all more simple with the MSC, the debugger of MSC is much better at least. In case I cannot fix this, I will take the MSC anyway.

Maybe the MinGW64 bit is the reason, as I have Win 7 32 bit.

Thanks you two

kind greets

Martin

PS: the computer is quite new, and I dont have internet yet to download the MSC. In the cafe I only got the SW for online installation I can use as soon I am online only.
