Subject: Re: What does !! in e.g. FtpClient class mean?
Posted by mirek on Mon, 15 Apr 2013 16:42:10 GMT

I am not FtpClient author and brief review of code indicates that in that particular case, using !! is redundant.

Anyway, sometimes it can have same benefit, see Prompt:

```
int Prompt(Callback1<const String&> WhenLink,
        const char *title, const Image& iconbmp, const char *qtf, bool okcancel,
        const char *button1, const char *button2, const char *button3,
    int cx,
    Image im1, Image im2, Image im3)
{
........
 int nbtn = !!button1 + !!button2 + !!button3;
```
