Subject: [BUG?]Like() always case sensitive on MySql

The Like() function always generates "like binary" on MySql regardless of whether I specify case sensitive (bool cs) or not.
This looks like a bug to me. I can't think of a reason to ignore the cs parameter on MySql.

```
SqlBool Like(const SqlVal& a, const SqlVal& b, bool cs) {
 return SqlBool(a, SqlCase
   (MY_SQL, " like binary ")
   (PGSQL, cs ? " like " : " ilike ")
   (" like "), b, SqlS::COMP);
}
```

I solved it in my program like this:

```
SqlBool iLike(const SqlVal& a, const SqlVal& b, bool cs) {
 return SqlBool(a, SqlCase
   (MY_SQL, cs ? " like binary " : " like ")
   (PGSQL, cs ? " like " : " ilike ")
   (" like "), b, SqlS::COMP);
}
```

(Release 5485)
