Hello all

I would like to improve text quality using Painter for small texts.

In the image it is the same screen with Draw and Painter. The small texts in the X axis (Jan, Feb, Mar, ...) look better with Draw.

This is the code for both:

```
void DrawText(Draw &w, double x, double y, int angle, const String &text, Font font, Color color) {  
    w.DrawText(fround(x), fround(y), angle, text, font, color);  
}
```

```
void DrawText(Painter &w, double x, double y, int angle, const String &text, Font font, Color color)  
{  
    w.Begin();  
    w.Translate(x, y).Rotate(-angle*M_PI/180.);  
    w.Text(0, 0, text, font).Fill(color);  
    w.End();  
}
```

Do you know how to improve the quality?
