lindquist wrote on Wed, 12 July 2006 14:42Hey.
I've been using Ultimate++ for a while now, but I'm interested in testing NTL in other projects as well, and using full UPP stuf is much more than I need right now.

Is the ntllib.org site maintained? and is the NTL download maintained? or will I be better off picking it out of a recent UPP distribution?

Thanx

no, no, yes...

Actually, to have somebody to maintain separate NTL would be nice..
