Hello nneilson,

This is the easiest way to change this flag:

1. Move mouse cursor to packeg list.
2. Press right button on it.
- C. Alternatively: MenuBar > Project

3. Find "Main package configuration..." and select it.
- C. We open configuration window.

4. Press left button on ArrayCtrl. (first row, "Flags" column)
- C. We should see characteristic button with arrow.

5. Click button with arrow.
- C. We open next configuration window.

6. Check NOGTK flag.
7. Press "OK" button.

If my tutorial proved to be not understandable, I have enclosed demonstrative image.

P.S.
"C." means comment.

Sincerely,
Klugier
