Hi again,

Here is another example showing the same error in a simple file copy situation.

```
FileIn in(GetDataFile("TestFile.txt"));
FileOut out(GetDataFile("Copy Of TestFile.txt"));
out.Put(in);
out.Flush();
LOG("Original filesize: " << in.GetSize());
LOG("Size of Copy: " << out.GetSize());
```

Log output:

```
Original filesize: 128
Size of Copy: 4096
```

It works if I exchange the second parameter click with n in Stream.cpp:458

Regards,
Steffen
