Zbych wrote on Sun, 26 May 2013 19:11It is hard to show something invisible, that's why I created fake ".svn" directory in $MyApps, to show what part of menu is missing Well, that explains my confusion

Zbych wrote on Sun, 26 May 2013 19:11Regarding missing SVN menu, as far as I know TheIde calls SvnDirs().GetCount() every time context menu is opened (in Ide::Project function).
Ok, now I see the problem, this sentece opened my eyes It should be simple to fix. Can you try the attached patch please? It works fine for me, but I haven't tested it with your use-case... If it works well, I will commit it.
