Hello,

I have a GridCtrl with a column containing a custom OptionImage with a three state

grid.AddColumn("Status", t_("Status"),4).Sortable(false).Ctrls(Avail3).Default(true);

where

```
void Avail3(One<Ctrl>& ctrl)
{
 ctrl.Create<OptionImage>().ThreeState().SetImage(Vega6Img::imgYes(), Vega6Img::imgNo(),
Vega6Img::imgMaybe());
}
```

Some times I need to turn off the entire column, i.e. the ctrl inside the column should not react (change state) to the user action.
I tried everything

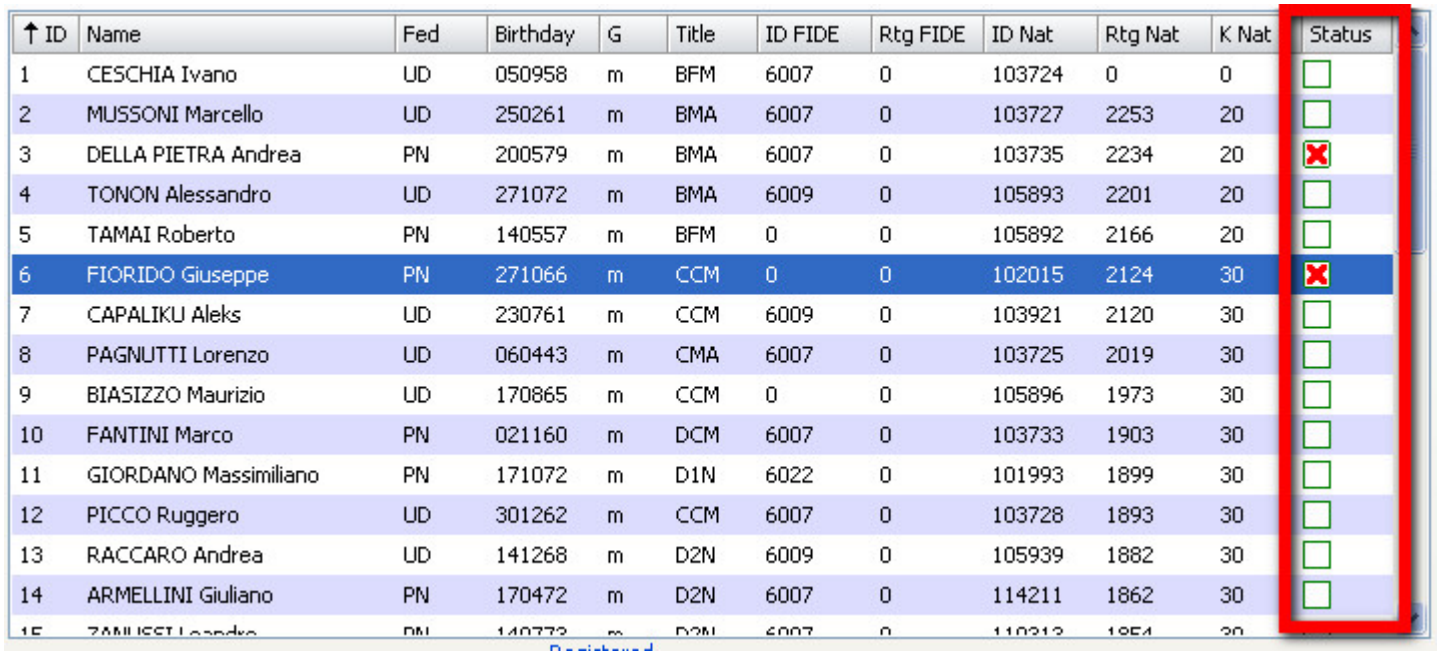

```
 grid.GetColumn(11).Locked(true);//.NoCtrls();//.NoEditable() ; //.NoClickable();
```

but the OptionImage is always there changing its status .
Is it possible to do something?

Thanks,
Luigi
