Subject: [Bug] Check box + sub-menu = problem
Posted by Novo on Wed, 03 Jul 2013 04:03:20 GMT

How to reproduce:
1) run reference/DockingExample1
2) Auto-hide any of docking controls by either using docking bar menu or by using auto-hide button.
3) Try to disable auto-hiding by using docking bar menu (try to uncheck checking box in menu item).

The same problem can be reproduced by trying to undock docked window using docking bar menu.

Check box doesn't work if there is a sub-menu.
Or it is supposed to be this way and I'm missing something.
