Seven wrote on Sun, 16 July 2006 23:31Hi. The librarie conio.h that cames integrated in upp-mingw package don't have some functions that i need. Functions like :
void textcolor (int cor);
void textbackground (int cor);
void delline (void);
void gotoxy (int x, int y);

Anyone can tell me where i can find a complete conio.h?
Thanks for your attention =)

I remind that "conio.h" is a non standard library, it means it is platform and compiler dependent. So at least you should specify for which platform you need it.
