Thanks.

Should you please explain these 2 lines. I don't understand what it means. I am new to C, thanks.

```
DBData() : port(3306) { }
DBData(const String& username, const String& password,
       const String& database, const String& host,
       const String& collate, const String& lockId, int port = 3306) :
    username(username), password(password), database(database),
    host(host), collate(collate), lockId(lockId), port(port) { }
```
