Subject: Allow line-break after '-' sign within a word?
Posted by zsolt on Fri, 02 Aug 2013 14:39:38 GMT

My problem is, that I have some very long words with multiple '-' signs and I want to allow line breaking after '-' signs.

E. g. I have a word like this: this-is-a-long-word-with-a-lot-of-minus-signs and it would be at the end of a line like:

some text .... this-is-a-long-word-
with-a-lot-of-minus-signs

So is it possible to change line breaking somhow or is there a non printing character allowing line break within a word?

Or can I change the rendering code? Where can I find this line breaking logic in U++ code?
