Alboni wrote on Wed, 07 August 2013 03:31I inspected the lines that were altered.

a-b+c sometimes gets interpreted as (a-b)+c and sometimes as a-(b+c) wich yelds a different result.

Nope, + operator associates left to right, so it's always (a - b) + c, which is the intended behaviour.
I forgot to take the 2 bytes of a jmp instruction, when decrypting on windows, at least for PROTECT.
I'll check again OBFUSCATE.....
