crydev wrote on Fri, 28 June 2013 09:07Hello,

I noticed you can set images as icon for tab pages. However, the image is not being scaled like it is in menubars and toolbars! Is there a builtin way to scale the image?

Rescale, CachedRescale.

Quote:
If not, what is the image size that will fit?

Thanks!

16x16
