Subject: Re: Default compiler flags
Posted by keltor on Fri, 30 Aug 2013 10:04:30 GMT

Hi again,

I have updated my U++ IDE to version 6254 and it seems that this issue is back. Now, even when I specify compiler flags, some of them get overwritten by the default TheIDE options. For instance, if I set /Ox (maximum optimisation) for Visual Studio 11 x64, I get

cl : Command line warning D9025 : overriding '/Ox' with '/O1'

I have switched back to an older version and it works fine. It seems to me that the new Visual Studio 11 support adds this, to me undesirable, behaviour.

Any thoughts on how to fix?

Keltor
