1) I will try first to rebuild the application... I will spend some times, but I think that there is some unknow problem on my side.

2) Using U++ 5485, when I try to compile, I get this error: Quote:c1xx : fatal error C1083: Cannot open compiler intermediate file: 'C:\Windows\Temp_CL_c10c8b6fex': Permission denied

Even if from control panel I change the temporary directory with a different one with all rights, I get the same errors.
