00:39Hello,

I am a C# programmer with a problem.

Thank you for not commenting on this I was very tempted to comment on this, but I decided not
to scare a newcomer right away

akspring wrote on Mon, 23 September 2013 09:53I would expect some optional features from
some of them, like "-supportlazy" or "-supportak" or "-badprogrammer" or something.This made
me laugh a lot

akspring wrote on Mon, 23 September 2013 09:53I looked at Alt+C, I read about it before but
didn't quite understand it. Now I do! Great little macro. Unfortunately, I tried creating a .h file with
it, but couldn't get it to work in my test program. I must be doing something wrong...It doesn't
create the entire .h file, only convert methods. You'd still have to write all the includes, class
declaration itself etc.

akspring wrote on Mon, 23 September 2013 09:53Thanks Honza, and what a great place this
forum is! Do I owe anyone a check? If you're really that enthusiastic, there is a paypall account

Honza
