Hi. If i am posting in the wrong forum excuse-me.Now, reporting my problems i use the last stable version 605 and the Assist++ doesn't work!Maybe the problem is that i don't know how to work with Assist++ but look ate the printscreen:

Well and i have another problem.I create a new package, but the new package doesn't appear on the selection project window. See it:

This problems are something that i don't know how to do on U++? Or they exist because are bugs of U++?
Sorry about large images. Thank you for your attention
