Subject: Problem copying from RichEdit to Word

Hello all

When copying from RichEdit (UWord sample) to Word, last paragraph formating is lost. However with LibreOffice works well.

It seems Word requires a \par label at the end of a rich text pasted from the clipboard. However this solution is not perfect as it adds a new line in Word.

I know this is not perfect, but Word compatibility would be improved doing this: In CtrlCore/EncodeRTF.cpp, RTFEncoder::PutTxt(), add a Command("par"); at the end.
