Hi all,

I've updated GraphCtrl/GraphDraw packages in svn sandbox.
The following enhancements/corrections were done:

- correction : Mouse move management now uses LocalLoop to catch mouse when scrolling and remove a nasty bug when moving mouse from one graph to another

- Some cleaning up of code

- Added some documentation (work in progress)

- Added FitToData() method (for each axis, and for all graph)

- Added UNDO/REDO capacities

- Added UNDO/REDO automatic merging ==> when actions are done very quickly(<500ms) (like wheel scroll or zoom), they are merged into ONE undo / redo action

Undo/redo works for all the move/scroll actions.

Properties undo/redo is next to come
