Sgifan wrote on Thu, 31 October 2013 06:31Hi,

Quick question: Why are TopWindow not handled as separate SDL2 windows (as SDL20 support this)?

BTW: Would a 'RAINBOW' section in the forums be usefull?

I guess we can start a thread about SDL20GL in Developer's corner.

If you are interested in this backend and willing to help, I would have some things to investigate for you
