Hi sigfan,

I have no idea what is going wrong.
I tried to reinstall MSC on wine and also reinstalled UPP on wine to have up to date code .... but doiing so, I crashed my MyApps dir with all my code in it   (UPP erased all the MyApps dir)

Fortunately I have a copy of it (but last copy was from about a month ago) and there is also svn copy for some packages, so ... I lost some work, but not to much in fact.

I will try to get a WIN PC for tomorrow to try and correct the issue, but no guaranty I can get one
