Hi un00b,

U++ is a flexible development tool as already described by Honza. Many compilers can be used to build your own applications using Ultimate libraries. For example, you could find below the build method for Microsoft MSC10:

C:\Program Files (x86)\Microsoft Visual Studio 10.0\Common7\Ide  
C:\Program Files (x86)\Microsoft Visual Studio 10.0\Vc\Bin  
C:\Program Files (x86)\Microsoft SDKs\Windows\v7.0A\Bin

C:\Program Files (x86)\Microsoft Visual Studio 10.0\Vc\Include  
C:\Program Files (x86)\Microsoft SDKs\Windows\v7.0A\Include

C:\Program Files (x86)\Microsoft Visual Studio 10.0\Vc\Lib  
C:\Program Files (x86)\Microsoft SDKs\Windows\v7.0A\Lib

Hope this could be helpful

Regards

Biobytes
