
Subject: T++ does not work with typedef enum {}

Hi,

I am currently trying to write some documentation for my packages and I ran into an issue:
In Topic++, the following codes do not work :

```
typedef enum FitToDataStrategy {  
    ALL_SERIES,  
    VISIBLE_SERIES_ONLY  
} FitToDataStrategy;
```

```
typedef enum {  
    ALL_SERIES,  
    VISIBLE_SERIES_ONLY  
} FitToDataStrategy;
```

The reference used by T++ is 'typedef' ... the name of the enum is lost and cannot be used

Can this be corrected, it keeps from using T++ correctly
