Hi Deepak:

Thanks for the feedback. UTF string might be interpreted differently in other encoding. Let's try a different example this time:

Text encoded: 0123456789012A0123456789012

Codewords sequence excluding error correction: 902 15 386 694 721 112 913 65 15 386 694 721 112
