NilaT wrote on Wed, 23 October 2013 05:22: Okay, I recognized that it doesn't link EVERY time, but almost...

Here an update from right now:

xxx: 63 file(s) built in (0:55.70), 884 msecs / file, duration = 57471 msecs, parallelization 62%  
Linking...

LINK : C:\xxx.exe wurde nicht gefunden oder beim letzten inkrementellen Linkvorgang nicht erstellt; vollständiger Link wird durchgeführt.

C:\xxx.exe (36297216 B) linked in (6:44.66)

OK. (6:52.85)

Hi,

first of all, this is non-critical error, rather warning.

What it really means is that incremental linking (which is supposed to speed-up link process) has failed to recognize the previous status of linking in .exe and/or .ilk files. Something made incremental linking "out-of-sync".

I guess that today, especially with SSD drives, the speed-up is mostly irrelevant. However, if you really want to get rid of it, you can try to delete target .exe and .ilk (linker will rebuild it then).

Mirek
