wimpie wrote on Wed, 16 October 2013 20:28Hello,

I am using SQLite, with a Schema with a few tables with references and I noticed I could delete rows in one table which were used in another.

After some digging I noticed in Sqlite3Schema.h the REFERENCES*** macro's are not defined.

First I wondered why, but after reading Sqlite doc's I think it's because it doesn't allow adding constraints to an existing table. Am I right?

Actually, it is rather because nobody bothered so far to implement it

In fact, the issue is in RM for 2 years already:

<http://www.ultimatepp.org/redmine/issues/172>

I did not know there is problem with adding references later, if that is true, it really is kind of problem...
